Jul. 2019 – Aug. 2022

EXPERIENCE

Brighty Official

Senior Fullstack Developer

Bekasi, Indonesia

Jun 2026 – Present

- Improved authentication and authorization workflows, strengthening SaaS services security.
- Enhanced scalability and maintainability by introducing worker scheduler architecture
- Established application observability using Prometheus with metrics for APIs, Databases, and scheduled jobs.
- Implemented internationalization (i18n) to enable multilingual support across the SaaS platform.
- Authored documentation improving knowledge sharing and maintainability

VA Insight Software Pte Ltd

Software Engineer

Jakarta, Indonesia

Oct 2022 – Jun 2026

- Designed and implemented enhancements for a Data Intelligence platform across backend services and deployment workflows in collaboration with cross-functional team
- Integrated Microsoft Entra ID (Azure AD) authentication, enabling enterprise SSO capabilities
- Implemented Kubernetes deployment support, improving application deployment consistency across environments
- Enhanced CI/CD pipelines and established test environments to streamline releases and improve software quality
- Improved application stability and maintainability through root cause analysis, bug resolution, and operational improvements
- Served as Scrum Master, facilitating sprint ceremonies and driving Agile practices to improve team delivery effectiveness

Machine Vision Indonesia

Back End Developer

Surabaya, Indonesia

Nov 2021 – Oct 2022

- Contributed to multiple client ERP projects through the software development lifecycle, from requirement gathering to deployment
- Developed backend services using NestJS within a microservices architecture, leveraging gRPC
- Handled data migrations from legacy systems to new ERP platforms in client production environments
- Supported deployment and integration in client environments, ensuring stability and performance post-delivery

MechTech Indonesia

Web Developer

Surabaya, Indonesia

Apr 2021 – Oct 2022

- Owned the end-to-end development and maintenance of the company's Learning Management System (LMS) built with Laravel and Vue.js.
- Modernized legacy modules, managed deployments, optimized application performance, and improved SEO.
- Mentored three internship batches through technical guidance and knowledge sharing.

OTHER PROJECT

Automated Finance Reporting System | Golang, Python, React Typescript

Jan 2026 – May 2026

- Worked closely with enterprise clients to define product requirements and align expectations
- Built a data processing engine transforming complex Excel-based financial reports into structured datasets
- Configured application deployment, testing environments, and operational workflows

AWARDS, TECHNICAL SKILLS
